What is EU Innovators?

EU Innovators brings entrepreneurs, students, experts and companies together to accelerate the development of new products and services.

An innovative idea, brought to us by an entrepreneur, student or freelancer, will be developed into a feasible product or service within only four weeks.

We support, maintain and inspire the whole process – from shaping and forming the original idea until the successful launch of the new product or service. We therefore value a healthy collaboration between motivated students, experts and Innovators.

As an intern at EU Innovators you get the chance and opportunity to show what you are worth. In a team consisting of four other students, you are responsible for the idea of an Innovator. You will be supported by our experts and partners to develop the idea into a viable product or service.

We need you!

We are always looking for motivated students from various studies that would like to work in multidisciplinary student teams to develop multiple innovative ideas into successful products or services.

Your role

Within EU Innovators you will work as a Business Administrator, Economist and Developer. While developing a new product or service you will be able to show and improve your own expertise. During your internship you will work on five different ideas for a period of five months.

You will work on concepts, business cases and models, profit and loss analyses and all the other disciplines and skills that are required to launch a new product or service.

Are you ambitious, a hard worker, passionate about entrepreneurship and want to be appreciated for your ideas, commitment and teamwork?
